

USING THE FILL SLEEVE

To use the fill sleeve, undo the buckle and uncurl the sleeve. Bend the sleeve around itself the opposite way it was stored/shipped. This will allow it to spring outward and hold the pot up properly.

STORING THE FILL SLEEVE

To store the fill sleeve again, curl the sleeve in the original direction and close the buckle strap around it. Store upright in a cool, dark place. The plastic may weaken after prolonged sunlight.
